1 The Attractiveness Meter shows the difference between the current trading prices for stocks and their respective consensus fair values. Differences between these values from our perspective, places the investment at an Attractive (denoted by A), Neutral (denoted by N) or Not Attractive (denoted by NA) level. We base this view by assessing the current P/E multiples in line with the consensus fair values. Consensus fair values are arrived at using a methodical approach that is highly subjective. Please read the disclaimer on the final page of this report.

Domestic news

NBK Capital issued a detailed report about the Kuwaiti economy, which showed that the banking sector witnessed a remarkable increase in credit despite the KD 40 million decline in loans extended to non-bank financial institutions. Moving on to the Money Supply, the investment bank said that Money supply (M1) was up in February (+KD 152 million) and the broader measure of money (M2) was up a stronger KD 286 million. NBK Capital also tackled the CPI figures of Kuwait, pointing out that inflation in the Consumer Price Index (CPI) rose to 3.8% year-on-year in February from 3.5% the previous month. Then the report moved on to expound on employment in Kuwait, stating that: "Kuwaiti employment grows 6% in 2011, in both the public and private sectors".

Regional and Global news

The Saudi Arabia Monetary Agency (SAMA) mentioned that Saudi Arabia's foreign assets increased by SR 96 billion (AED 94 billion) in the first quarter of 2011 due to high oil prices and output. Assets of SAMA soared to an all time high of SR 2,154 billion (AED 2,132 billion) at the end of March compared with SR 2,057 billion (AED 2,038 billion) at the end of 2010. Deposits with banks abroad surged by around SR 81 billion to SR 495.2 billion from SR 414 billion (AED 430 billion). Investment in foreign securities swelled by nearly SR 19 billion to SR 1,446 billion (AED 1,422 billion) from SR 1,427 billion (AED 1,413 billion).

According to the Central Bank data, Egypt's foreign reserves increased to \$15.21 billion in April from \$15.12 billion a month earlier. Reserves reached \$36 billion in December 2010 and dropped on a monthly basis since January's uprising. Some economists forecast that the pound will decline sharply as the reserves seem to approach a dangerous level, and foreign donations that have been long awaited, were repeatedly delayed.

The National Statistics Office showed that UK industrial production dropped 0.3% in March from a month ago, compared to the 0.4% increase recorded in February. This level came in line with what economists expected. The manufacturing production rose 0.9% M-o-M in March, from the 1.1% decline a month ago, whereas economists forecasted the manufacturing output to increase by 0.5%.
