

Arab Insurance Group (B.S.C.)

**Report of the Board of Directors and
Consolidated Financial Statements
for the year ended 31 December 2017**

REPORT OF THE BOARD OF DIRECTORS

Dear Shareholders,

The Directors of the Arab Insurance Group (B.S.C.) (Arig) are pleased to present the Company's 37th Annual Report and Consolidated Financial Statements for the 2017 Financial Year.

GROUP PERFORMANCE

Despite the high level of catastrophe losses experienced in 2017 and a major fire loss in UAE "ADNOC refinery", Arig continued to generate a positive result in 2017 of US\$ 7.2 million attributable to shareholders (2016: US\$ 9.2 million) backed by positive technical performance and higher investment earnings.

In addition, on 22 November 2017, A.M. Best affirmed Arig's Financial Strength Rating of 'A- (Excellent)', and its Long-Term Issuer Credit Rating of "a-". The outlook of both ratings remains stable. The rating agency highlighted in their related press release "the ratings reflect Arig's very strong balance sheet strength, its adequate operating performance, neutral business profile and appropriate enterprise risk management".

Arig's Gross written premiums declined to US\$ 225.6 million (2016: US\$ 245.4 million), reflecting strict price oriented underwriting approach, unwillingness to follow soft-market practices on the expense of top-line, negative influence of exchange rate movements and inadequately priced accounts coupled with downward premium adjustments to our Lloyd's portfolio.

The total investment income for the Company reached US\$ 22.3 million (2016: US\$ 19.3 million) reflecting strategic portfolio positioning.

THE MARKET

Economic Situation

After a year of political earthquakes, 2017 produced its share of significant world events. The most prominent ones were:

The world witnessed the inauguration of the 45th President of the United States of America heralding a drastic change in policy and a new vision at the White House. The paramount slogan of the new Administration is "America first" in the full sense of its meaning. The USA cancelled its participation in the Trans-Pacific Partnership and has withdrawn from the Paris Climate Agreement. Also, the approach of the Administration towards US "unfriendly" countries has become much stricter.

The presidential elections in France as well as the vote for the German Bundestag were, especially after the unexpected win of the Brexit-Supporters in the United Kingdom, the most important political events in Europe and anxiously awaited. The result of both turned out to be in favour of the European Union and diminished earlier fears fuelled by the rise of right-wing populism.

However, the United Kingdom continued its path towards an exit from the European Union by invoking Article 50 of the Lisbon Treaty. Britain has now until March 2019 to negotiate the terms of its departure and may endure a "hard Brexit", depending on how much disruption its divorce from the EU causes.

One of the most significant highlights in the Arab World was the promotion of Saudi Arabia's Royal Highness, Prince Mohammad bin Salman, as Crown Prince. His "Vision 2030" aims to modernize Saudi Arabia's economy and society and to prepare the country for a post-oil future, by transforming the Kingdom into an investment powerhouse and by empowering the private sector. Addressing corruption has also been a central topic on his ambitious agenda. Another development has been the growing tensions with neighbouring Qatar which is affecting trade, movement of capital and people.

The civil wars in Syria, Iraq, Libya, and Yemen remain. Besides being humanitarian disasters, they represent a significant challenge for the entire region, economically as well as socially.

The agreement of OPEC and non-OPEC producers led by Russia to extend oil output cuts until the end of 2018 and limit oil production, coupled with geopolitical tensions in the Middle East has supported crude oil prices. These have risen by about 20 percent between August 2017 and mid-December 2017 to over \$60 per barrel. The increase in fuel prices raised headline inflation in advanced economies, but wage and core-price inflation remain weak. Among emerging market economies, headline and core inflation have ticked up slightly in recent months after declining earlier in 2017.

Ten years after the 2008 financial crisis, global economic growth is accelerating and stock markets around the world are hitting record highs. The International Monetary Fund (IMF) estimated in its latest World Economic Outlook (January 2018) an overall world output of 3.7% for 2017, 0.5 % point higher than in 2016. About 120 economies representing three-quarters of the world GDP have seen a pick-up growth in year-on-year terms in 2017.

Growth in most emerging market and developing economies (EMDEs) with large numbers of commodity

REPORT OF THE BOARD OF DIRECTORS

exporters recovered in 2017, with the significant exception of the Middle East and North Africa, mainly due to oil production cuts. EMDEs are expected to grow by 4.7% in 2017 (2016: 4.4%) against a growth of 2.3% (2016: 1.7%) in the advanced economies. China will remain at the top of the list with an expected growth of 6.8% (2016: 6.7%). A high growth of 6.7% is also expected in India; however, at a slightly lower level than 2016 growth of 7.1%.

Growth has been constrained in the MENA region with 2.5% estimate growth due to the impact of geopolitical tensions and on-going security concerns. One of the core markets that is expected to perform at a considerable lower level against 2016 is the Kingdom of Saudi Arabia -0.7% (2016: 1.7%).

The growth in Sub-Saharan Africa is expected to increase to 2.7% against 1.4% in 2016.

In the USA, the growth forecast has been revised upwards, given the stronger than expected activity in 2017, higher projected external demand and the expected macroeconomic impact of the tax reform; in particular, the tax cuts and the temporary allowance for full expensing of investment. The economic growth 2017 is estimated at 2.3% compared to 1.5% in 2016.

Post-Brexit, Britain's economy is underperforming. Sterling has depreciated, inflation has gone up. As a result, wages have been squeezed and investments have slowed down. The overall outlook for the UK in 2017 is 1.9% (2016: 1.9%).

Insurance and Reinsurance

The year 2017 will remain a prominent one in the reinsurance industry. According to Munich Re, natural catastrophe events in 2017 have caused record insurance and reinsurance market losses, with the total industry bill estimated at US\$ 135 billion (representing 41% of economic loss for 2017 of US\$ 330 billion). According to A.M. Best report published in early 2018, Lloyd's share in these losses is estimated to reach US\$ 4.8 billion, topping by this the list of insurers and reinsurers covering these catastrophes. Swiss Re also recently put 2017 insured natural disaster losses at the same level of US\$ 131 billion. In fact, 2017 is the second most costly natural catastrophe year on an economic basis behind 2011 when the Tohoku earthquake and tsunami pushed economic losses for the year to US\$ 345 billion, in today's dollars.

The primary driver of the losses in 2017 was three Atlantic hurricanes in the third quarter. Harvey, Irma, and Maria (HIM) which are estimated to have caused US\$ 200 billion of economic losses and around US\$ 80 billion of insured losses. In addition, other severe storms and wildfires in

California are set to become the costliest wildfire loss in US history with estimated insured losses at around US\$ 8 billion.

According to Swiss Re's data, the combined ratio of US Property & Casualty insurers is forecast to reach 109% in 2017, eight percentage points higher compared with 2016. The combined ratio for non-life reinsurer is estimated to hit 115%, mainly due to the hurricane losses, coupled with a number of other natural catastrophe events, including cyclone Debbie in Australia, earthquakes in Mexico and wildfires in California and Southern Europe. As a consequence, overall global industry profitability (ROE) for the full year is forecast to come in at around -4%.

Aon Benfield estimates that the global reinsurance capacity increased to US\$ 600 billion at September 30, 2017. This figure includes conventional reinsurance as well as alternative capital. It is estimated that less than a third of 2017 losses fell into the private reinsurance market, representing a very manageable burden relative to the available capital base. 2017 losses have been absorbed without compromising the availability of reinsurance capacity, as more risk was being retained by primary insurers and more catastrophe exposure had been laid-off into the capital markets which confirm that the traditional reinsurers were well-capitalized. On the other hand, global reinsurance demand increased modestly during 2017 as a result of improved economics, the growing prevalence of risk-based capital regimes and emerging areas of risk transfer.

Capital availability and regulatory change are also resulting in new reinsurance company formations in rapidly developing and promising markets such as China and India.

According to the most recent report from PwC "US Insurance Deals Insights 1H2017", M&A activity in the insurance sector more than tripled to US\$10 billion in the first half of 2017 compared to US\$2.9 billion the same period last year.

The reinsurance market is continuously adapting to the ever-changing political risk environment, particularly during the current climate of increasing global political instability. When combined with the rapid emergence of new technologies, big data and predictive analytics, insurers will be presented with major challenges in the coming years in order to stay relevant and close gaps in existing coverage.

In our region, the most powerful driver of insurance and reinsurance demand remains to be medical insurance, which continues to be the fastest growing line of business. This trend is driven by the introduction of new compulsory

REPORT OF THE BOARD OF DIRECTORS

health insurance requirements which continue to evolve.

The region continues to remain attractive to global insurers and reinsurers, in view of the relatively low natural catastrophe exposure (except for Turkey, Iran, and Algeria).

Overall, reinsurance pricing has moved up in lines and territories most affected by recent losses, but not to the expected level given the amount of new capital entering the sector.

ARIG'S POSITION

Despite the challenging market conditions and a major market fire loss in UAE (ADNOC refinery) which is currently estimated at US\$ 1.2 billion - making it one of the costliest claims in the MENA region - the overall technical return for the Group remained positive at US\$ 5.5 million (2016: US\$ 14.7 million). Our Lloyd's portfolio returned negative results of US\$ 19.6 million (2016: loss of US\$ 4.6 million) due to significant losses from most Lloyd's syndicates, who in return were affected by the 2017 US hurricane losses. While keeping in mind fast recovery potentials resulting from improved terms of trade, especially in the US insurance market, the Company revisited during the 2018 renewals, its Lloyd's portfolio and took corrective measures leading to the complete withdrawal from the worst performing syndicate.

Our non-life facultative portfolio showed, as in the previous years, a healthy performance of US\$ 20.5 million (2016: US\$ 11.0 million).

The life business performed well, comparing to the previous year, with technical results of US\$ 1.1 million (2016: loss of US\$ 2.5 million).

Our discontinued Takaful Re portfolio is also running off smoothly, and this has additionally benefited our bottom line by US\$ 1.2 million (2016: US\$ 1.2 million).

Gross written premiums were down by 8.1% for the year 2017, reflecting the negative influence of exchange rate movements, voluntary premium reductions in some under-performing accounts, mainly in the MENA region coupled with downward premium adjustments of our Lloyd's portfolio. Additionally, premium income reduced following the closure of our Takaful Re and our Branches in Singapore and Labuan.

The upgrade of Arig rating by A.M Best to 'A-' in late December 2016 was too late to have any effect on our 2017 treaty portfolio. The impact was more on our Facultative business where we managed to increase the premiums during 2017 by US\$ 9.5 million, representing a growth of 41.4%

The Company also continued to manage its operating expenses. Operating expenses have been reduced by 12.7% compared with last year.

Under the current challenging market conditions, we continue to identify new products and opportunities to look for alternative solutions to the challenges at hand to maintain the Company's profitability.

The investment income increased by 15.5% in 2017 as compared to the previous year to reach US\$ 22.3 million (2016: US\$ 19.3 million) as a result of continuing positive equity returns. Our continued and well-executed investment strategy significantly contributed to the overall group profit.

OUTLOOK

The world economic performance is expected to strengthen. Improved global manufacturing activities, a robust global trade, broadly favourable financing conditions and firming commodity prices amid an investment-led recovery in advanced economies are reaffirming this prediction.

The IMF's recent update estimated an overall projected world output of 3.9% for 2018. Emerging Markets and developing countries are expected to grow by 4.9% in the same period. The WEO stated that broad-based cyclical global recovery is underway, aided by a rebound in investment and trade, against the backdrop of benign financing conditions, generally accommodative policies, improved confidence and the dissipating impact of the earlier commodity price collapse. Global growth is expected to be sustained over the next couple of years - and even accelerate somewhat in emerging market and developing economies (EMDEs) thanks to a rebound in commodity exporters.

In 2018, the Kingdom of Saudi Arabia and the United Arab Emirates have introduced VAT and the expectation is that other GCC countries will follow suit during 2018/2019 which may have inflation implication in the region.

After a challenging year that caused historically high natural catastrophe losses to reinsurers who were already affected by low rates and investment yields, 2018 is expected to offer an improved operating environment as a result of recovering terms of trade in addition to stronger economic growth.

Lloyd's insurers' outlook for 2018 is positive, as January renewals make for a promising start after several years of falling prices. Direct and facultative property business saw the highest price increases. Most price improvement has been seen in loss affected US business where rates went up by a minimum of 10%, with some rate rises as much

REPORT OF THE BOARD OF DIRECTORS

as 25%. For the remainder of 2018, pricing is expected to be strong despite the high level of available capital in the industry. This is in part because much of the upcoming renewals will be related to US wind exposed business, which was affected by large losses in 2017¹.

Premium growth and underwriting profitability are expected to pick up in 2018 and 2019, driven by an increase in the demand for non-life insurance. This growth will come predominantly from emerging markets, with premium growth forecast at 6% and 7% in 2018 and 2019 respectively in real terms. For advanced markets, modest improvements in macro conditions and accelerating inflation are expected to subdue real growth. In nominal terms, premium growth momentum is expected to accelerate marginally, driven by economic activity and moderate price increases².

Rate increases during 2018 will be contingent on catastrophe loss experience during 2017. Insurers subjected to heavy catastrophe losses can expect significant rate increases, particularly those exposed to the most hard-hit areas such as the USA and Caribbean. There is a general consensus that these insurers will see rate rises as high as 20-30%. Conversely, rates are expected to remain flat for those insurers who have not been affected by such losses³.

The main sensitivities going forward are further large losses, unexpected movements in interest rates and developments that drive changes in market structure. Issues to watch for include the unwinding of quantitative easing, the progress of 'Brexit' negotiations, the impacts of US tax reform, the prospect of further sector consolidation and the creep of protectionism⁴.

At Arig, our focus will remain on maintaining a well-balanced portfolio, while benefitting from market opportunities in a controlled and opportunistic manner. At the same time we continue applying capital modelling techniques to ensure that our risk-adjusted capital remains at appropriate levels.

After the establishment of Arig Insurance Management (DIFC) (AIM) in Dubai during 2017, we intend to transform it into an "off balance-sheet" and purely fee-based operation. The aim is to further diversify and balance our income stream by adding a third column to our current operation, besides our primary activity as risk-carrier and investor.

We are, in line with the mentioned intention, entering into cover-holder agreements with a number of Lloyd's syndicates. The objective is to write for, and on their behalf, niche products which are currently not offered by Arig or which could create synergy effects for both parties.

The fact that AIM is located at the DIFC surely adds value in this regard.

DIFC has positioned itself not only as an important reinsurance hub for the region, but also for business emanating from Africa. The majority of the leading reinsurance brokers are represented, in one way or another, at the DIFC. These brokers are controlling the placement of largely better performing corporate accounts, which should improve AIM's access to such business.

The affirmation of Arig's rating by A.M. Best allows us further access to business, where "A" rating is either a prerequisite, due to risk-based solvency regimes or where restrictions were previously placed due to management directives. For example, this applies to our engagement in facultative business, which is a targeted growth area or in many Far-Eastern markets.

In 2017, Arig expanded its development into Personal Lines business as a diversification tool, enjoying double digit reinsurance premium growth. Through its partnership with a pioneering Personal Lines technology company, it has been able to deliver a complete 'front to back' solution to one of its customers, enabling them in turn to deliver e-commerce insurance. Using these platforms, it is easier to launch and if necessary re-engineer product portfolios, as well as promote more effective cross selling as buyers establish online insurance profiles which can be interrogated intelligently for marketing. Furthermore, by using these digital developments, Arig is already in discussion with potential partners to expand its presence into more diverse markets.

Despite the current industry environment, Arig remains highly confident that we are well equipped to deal with the challenges at hand. Our reinsurance and investment portfolios are sufficiently diversified and our risk management is vigilant. We believe we can turn volatility into a profitable business across the business cycles by using our financial strength, market presence and third party relationships.

Our prime focus will remain on the protection of our policyholders and our shareholders' capital, while providing reasonable returns on our equity.

ACKNOWLEDGEMENTS

The Board takes this opportunity to express its gratitude to His Majesty the King, His Royal Highness the Prime Minister and His Royal Highness the Crown Prince for their wise leadership and encouragement for the insurance sector of the Kingdom of Bahrain. The Directors further extend their thanks to our business partners, clients, shareholders and the Central Bank of Bahrain for their support and cooperation throughout the year. The Directors also thank the Management team and the staff of Arig Group for their commitment, professionalism and sincere efforts.

On behalf of the Board of Directors

The accompanying notes 1 to 35 are an integral part of these consolidated financial statements.

ARAB INSURANCE GROUP (B.S.C.)

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2017

1. INCORPORATION AND PRINCIPAL ACTIVITY

Arab Insurance Group (B.S.C.) (the "Company", "parent company") is an international insurance company registered as a Bahraini Shareholding Company having its registered office at Arig House, Manama, Kingdom of Bahrain. The parent company and its subsidiaries (the "Group") are involved in provision of general (non-life) and life reinsurance and related service activities.

2. SIGNIFICANT ACCOUNTING POLICIES

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), issued by the International Accounting Standards Board and are consistent with prevailing practice within the insurance industry.

The Group's financial statements are presented in U.S. Dollars, which is its functional currency as its share capital and a significant proportion of its business, assets and liabilities are denominated in that currency.

The consolidated financial statements are prepared under the historical cost convention as modified by the revaluation of land and building and certain investment assets.

Comparative figures have been reclassified and restated, where necessary, to conform to the current year's presentation.

The Group has adopted the following new and revised IFRS and interpretations which became effective as of 1 January 2017:

- IAS 7 Statement of Cash Flow
Standard issued in January 2016

The amendments require disclosures that enable users of consolidated financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flow and non-cash changes.

To satisfy the new disclosure requirements, a reconciliation between the opening and closing balances of liabilities arising from financing activities has been included as note 31.

- Improvements to IFRSs (2016)

Improvements to IFRSs in the 2014-2016 cycles include a number of amendments to various IFRSs. Most amendments will apply prospectively for annual periods beginning on or after 1 January 2017 with early application permitted.

The adoption of this amendment has no material impact on the financial statements.

2. SIGNIFICANT ACCOUNTING POLICIES (Contd.)

The following standards and interpretations have been issued but are applicable for periods subsequent to the year ended 31 December 2017:

- IFRS 4 Insurance Contracts
Standard issued September 2016

Amendments to the standard permit entities issuing contracts within the scope of IFRS 4 a temporary exemption. The temporary exemption enables eligible entities to defer the implementation date of IFRS 9 for annual periods beginning 1 January 2021 at the latest. An entity may apply the temporary exemption from IFRS 9 if and only if

- (i) it has not previously applied any version of IFRS 9 before and
- (ii) its activities are predominantly connected with insurance on its annual reporting date that immediately precedes 1 April 2016.

The Group has determined that its activities are predominantly connected with insurance and has decided that it will apply the temporary exemption from IFRS9. The temporary exemption from IFRS 9 is available from 1 January 2018.

- IFRS 9 Financial Instruments
Standard issued July 2014

IFRS 9 replaces the existing IAS 39 Financial Instruments: Recognition and Measurement. IFRS 9 includes revised guidance on the classification and measurement of financial instruments, including a new expected credit loss model for calculating impairment on financial assets, and the new general hedge accounting requirements. It also carries forward the guidance on recognition and derecognition of financial instruments from IAS 39. The standard is applicable from 1 January 2018 with early adoption permitted. However, the Group has decided to apply the temporary exemption available under IFRS 4 and will therefore apply this standard for annual periods beginning 1 January 2021.

- IFRS 15 Revenue from Contracts with Customers
Standard issued May 2014

IFRS 15 establishes a comprehensive framework for determining whether, how much and when revenue is recognized. It replaces existing revenue recognition guidance, including IAS 18 Revenue, IAS 11 Construction Contracts and IFRIC 13 Customer Loyalty Programmes. The standard is effective for annual reporting periods beginning on or after 1 January 2018, with early adoption permitted. The Group is not expecting a significant impact from the adoption of this standard.

- IFRS 16 Leases
Standard issued in January 2016

IFRS 16 introduces a single, accounting model for lessees. A lessee recognises a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. There are optional exemptions for short-term leases and leases of low value items. Lessor accounting remains similar to the current standard i.e. lessors continue to classify leases as finance or operating leases. The standard is effective for annual reporting periods beginning on or after 1 January 2019. The Group is not expecting a significant impact from the adoption of this standard.

2. SIGNIFICANT ACCOUNTING POLICIES (Contd.)

- IFRS 17 Insurance Contracts
Standard issued in May 2017

IFRS 17 Insurance Contracts establishes principles for the recognition, measurement, presentation and disclosure of insurance contracts within the scope of the standard. The objective of IFRS 17 is to ensure that an entity provides relevant information that faithfully represents those contracts. This information gives a basis for users of financial statements to assess the effect that insurance contracts have on the entity's financial position, financial performance and cash flows. The standard is applicable for annual periods beginning on or after 1 January 2021. The Group is assessing the impact of IFRS 17 on its consolidated financial statements.

The Group did not early-adopt new or amended standards in 2017.

The significant accounting policies of the Group are as follows:

BASIS OF CONSOLIDATION

The consolidated financial statements include the accounts of the parent company and all of its subsidiaries made up to 31 December 2017 except for Arig Capital Limited which is consolidated one quarter in arrears.

Subsidiaries are defined as entities that are controlled by the Group, on the basis of

- i) power over the entity;
- ii) the exposure to variable returns from the entity; and
- iii) the ability to use its power to affect the amount of returns.

The purchase method is used to account for acquisitions.

All intra-group transactions, balances and unrealised surpluses and deficits on transactions between group companies have been eliminated on consolidation. Where necessary, the accounts of subsidiaries have been restated to ensure consistency with the accounting policies adopted by the Group.

A listing of the principal subsidiaries is set out in note 33. In the parent company, these investments are accounted under IAS 39, Financial Instruments: Recognition and Measurement.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise cash on hand, bank balances and short-term highly liquid assets (placements with financial institutions) with original maturities of three months or less when acquired that are subject to insignificant risk of changes in their fair value, and are used by the Group in the management of its short-term commitments. Bank balances that are restricted and not available for day to day operations of the Group are not included in cash and cash equivalents.

INVESTMENTS

Investment securities are classified as 'at fair value through profit or loss', which includes financial assets held for trading and those designated at fair value on initial recognition, 'available for sale', 'held to maturity' or 'loans and receivables'. Management determines the appropriate classification of investments at the time of purchase.

2. SIGNIFICANT ACCOUNTING POLICIES (Contd.)

Securities are classified as at fair value through profit or loss if they are acquired for the purpose of generating a profit from short-term fluctuations in price or if so designated by management. Derivative financial instruments that are not designated as accounting hedge are classified as at fair value through profit or loss. Investments with fixed or determinable payments and fixed maturity that the management has the intent and ability to hold to maturity are classified as held to maturity. Financial instruments with fixed or determinable payments and that are not quoted in an active market are categorised as loans and receivables. Securities intended to be held for an indefinite period of time and those that are not classified as at fair value through profit or loss, held to maturity or loans and receivables, which may be sold in response to needs for liquidity or changes in interest rates, are classified as available for sale.

All purchases and sales of investments are recognised at the settlement date. All investment assets are recognised initially at cost. After initial recognition, investments are valued using principles described below.

Investments at fair value through profit or loss and investments available for sale are carried at fair value. Held to maturity investments and loans and receivables are carried at amortised cost, less any adjustment necessary for impairment.

Fair values are measured using market observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in valuation (see note 32).

PROVISION FOR IMPAIRMENT OF FINANCIAL ASSETS

A provision is made in respect of a financial asset that is impaired if its carrying amount is greater than its estimated recoverable amount.

Provisions for assets carried at amortised cost are calculated as the difference between the carrying amount of the assets and the present value of expected future cash flows discounted at their original effective interest rate. By comparison, the recoverable amount of an instrument carried at cost is the present value of expected future cash flows discounted at the current market rate of interest for a similar financial asset.

In the case of available for sale financial assets, the Group assesses at each statement of financial position date whether there is an objective evidence of impairment of such assets. If any such evidence exists, the impairment is recognised in income. Evidence of impairment considers among other factors significant or prolonged decline in market values and financial difficulties of the issuer. Impairment recognised is not reversed subsequently except in case of debt instruments.

INVESTMENT IN ASSOCIATED COMPANIES

Investments in associated companies are accounted for using the equity method, less any adjustment necessary for impairment. Associated companies are defined as those companies over which the Group is able to exercise significant influence but not control or joint control over the financial and operating policy decisions.

INSURANCE RECEIVABLES

Insurance receivables are carried at anticipated realisable values after provision for impairment. A provision for impairment is established when there is evidence that the Group will not be able to collect all amounts due according to the terms of the receivables. In case of receivables not specifically impaired, a collective evaluation of impairment is carried out based on historical loss experience. Bad debts are written off during the year in which they are identified. The identification of bad debts is based on an analysis of the financial position of the counter party.

2. SIGNIFICANT ACCOUNTING POLICIES (Contd.)

INSURANCE DEPOSITS

Insurance deposits comprise premium and claim deposits with cedants in accordance with policy terms and are carried at anticipated realisable values after provision for impairment. A provision for impairment is established when there is evidence that the Group will not be able to collect all amounts due according to the terms of the deposits. In case of deposits not specifically impaired, a collective evaluation of impairment is carried out based on historical loss experience. Irrecoverable deposits are written off during the year in which they are identified. Irrecoverable deposits are identified on an analysis of the financial position of the counter party.

INTANGIBLE ASSETS

Expenditure on software, patents, present value of future profits on acquisition of portfolio and licenses are capitalised and amortised using the straight line basis over their expected useful lives, not exceeding a period of 5 years.

Costs associated with developing computer software programmes are recognised as an expense when incurred. However, costs that are clearly associated with an identifiable and unique product, which will be controlled by the Group and has a probable benefit exceeding the costs beyond one year, are recognised as intangible assets. Costs include staff costs of the development team and an appropriate portion of relevant overheads.

Expenditure, which enhances and extends the benefits of computer software programmes beyond their original specifications and lives is recognised as a capital improvement and added to the original cost of the software. The carrying amount of intangible assets is reviewed annually and adjusted for impairment where it is considered necessary.

PROPERTY & EQUIPMENT

Property & equipment are stated at cost less accumulated depreciation except for land and building which are carried at their revalued amount being fair value on date of valuation on a rolling basis by independent external valuers, less accumulated depreciation. On revaluation, any increase in the carrying amount of the asset is carried in the shareholders' equity as Property Revaluation Reserve and any decrease is recognised as an expense, except to the extent that it reverses decreases or increases previously recognised through income or shareholders' equity. The balance in the Property Revaluation Reserve is transferred directly to Retained Earnings on sale of property and realization of surplus. Further, the difference between depreciation based on the revalued carrying amounts and the depreciation based on original cost of the property is transferred directly from Property Revaluation Reserve to Retained Earnings.

The cost of additions and major improvements are capitalised; maintenance and repairs are charged to expense as incurred. Gains or losses on disposal are reflected in other income. Depreciation is provided on straight-line basis over the expected useful lives of the assets, which are as follows:

Building	40	years
Electrical and mechanical	20	years
Information systems, furniture, equipment and others	3-5	years

Useful lives and residual values are reassessed at each reporting period and adjusted accordingly. At each reporting date, the Group reviews the carrying amounts to determine whether there is any indication of impairment.

If any such indication exists, then the assets recoverable amount is estimated.

2. SIGNIFICANT ACCOUNTING POLICIES (Contd.)

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or Cash Generating Units (CGU).

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.

PROVISIONS

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. Employee entitlements are recognised when they accrue to employees, with a provision being carried for the estimated liability as a result of services rendered upto the statement of financial position date.

POST EMPLOYMENT OBLIGATIONS

The Group operates a number of defined benefit plans for its employees.

For defined benefit plans, the accounting cost except for actuarial gains or losses, is charged to the income statement so as to spread it over the expected service lives of employees. The accounting costs under these plans are measured as the present value of the estimated future cash outflows using interest rates of government securities, which have terms to maturity approximating the terms of the related liability. Actuarial gains or losses are carried in the comprehensive income statement.

TREASURY STOCK

Treasury stock representing shares purchased by the parent company or its consolidated subsidiaries are carried at cost with the exception of holdings as on the date of capital reduction, 4 July 2002, which are carried at nominal value. All treasury stock is presented as a deduction from shareholders' equity and gains and losses from sale of these shares are presented as a change in shareholders' equity.

RECOGNITION OF UNDERWRITING RESULT

Insurance business is accounted for in a manner consistent with prevailing practice within the insurance industry, more specifically, on an annual accounting basis. Specific accounting policies relating to individual items of insurance revenues and costs and technical provisions are explained below for each relevant item.

PREMIUMS

Gross premiums written comprise the total premiums in relation to contracts incepting during the financial year, together with adjustments arising in the financial year to premiums receivable in respect of business written in previous financial years. It includes an estimate of pipeline premiums, being those premiums written but not reported to the Group at the statement of financial position date. Pipeline premiums are reported as accrued insurance premiums.

2. SIGNIFICANT ACCOUNTING POLICIES (Contd.)

Premiums, net of reinsurance, are taken to income over the terms of the related contracts or policies. Unearned premiums are those proportions of the premiums accounted for, which relate to periods of risk that extend beyond the end of the financial year; they are calculated based on a time apportionment basis. A provision for unexpired risks is made for estimated amounts required over and above provisions for unearned premiums to meet future claims and related expenses on business in force at the statement of financial position date. Such provision, where necessary, is made on the basis of an assessment of segments in which policies with similar risk profile are grouped together.

CLAIMS AND RELATED EXPENSES

Claims and related expenses are accounted for based on reports received and subsequent review on an individual case basis. Provision is made to cover the estimated ultimate cost of settling claims arising out of events, which have occurred by the end of the financial year, including unreported losses, and claims handling expenses. Provision for unreported claims is established based on actuarial analysis and application of underwriting judgment having regard to the range of uncertainty as to the eventual outcome for each category of business.

POLICY ACQUISITION COSTS

Commissions, taxes, brokerages and other variable underwriting costs directly associated with acquiring business are amortised over the period in which the related premiums are earned. Policy acquisition costs that relate to periods of risk that extend beyond the end of the financial year are reported as deferred policy acquisition costs.

REINSURANCE ARRANGEMENTS

As part of managing its insurance risks, the Group enters into contracts with other reinsurers for compensation of losses on insurance contracts issued by the Group.

Compensations receivable from reinsurers are estimated in a manner consistent with the corresponding claim liability. The benefits and obligations arising under reinsurance contracts are recognised in income and the related assets and liabilities are recognised as accounts receivable, reinsurers' share of technical reserves and accounts payable.

LIABILITY ADEQUACY TEST

At each statement of financial position date, liability adequacy tests are performed to ensure adequacy of the contractual liabilities net of related deferred acquisition costs. In performing these tests, current best estimates of future contractual undiscounted cash flows and claims handling and administrative expenses are considered. The tests are performed on a portfolio basis where policies with similar risk profile are grouped together as a portfolio.

INVESTMENT INCOME

Investment income comprises interest and dividend receivable for the financial year. Gains and losses arising from changes in the fair value of investments at fair value through profit or loss are included in the income statement in the period in which they arise. Gains and losses arising from changes in the fair value of available for sale investments are recognised in other comprehensive income and carried in investment revaluation income as part of equity. When available for sale investments are disposed or are impaired, the related fair value adjustments are included in the income statement.

Investment income arising from insurance business investment assets are allocated to the underwriting results of insurance businesses based on the proportion of their respective insurance funds to shareholders' funds during the financial year.

2. SIGNIFICANT ACCOUNTING POLICIES (Contd.)

FOREIGN CURRENCY TRANSLATION

Transactions denominated in currencies other than U.S. Dollars are recorded at the rates ruling at the date of the transaction. All monetary and non-monetary assets carried at fair value denominated in currencies other than U.S. Dollars are translated at year-end exchange rates.

Unrealised gains or losses on translation are taken to income except in respect of non-monetary available for sale investments, which are taken to equity until they are disposed.

Unrealised gains and losses on translation of financial statements of subsidiaries are included in equity. Other foreign currency gains and losses are taken to income.

DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING

In the ordinary course of its business, the Group uses forward foreign exchange contracts as fair value hedges to protect its exposures in respect of foreign currency denominated investments and insurance liabilities and these contracts are carried at fair value.

Where a fair value hedge meets the conditions prescribed by International Financial Reporting Standards for qualifying as an effective hedge, gains or losses from remeasuring forward foreign exchange contracts and gains or losses on hedged assets attributable to the hedged risk are recognised in income.

Where the hedge is not effective, gains or losses from remeasuring forward foreign exchange contracts are recognised in income. Gains or losses on hedged assets are recognised in income except in respect of non-monetary available for sale investments, which are taken to equity until they are disposed.

The gain or losses from remeasuring insurance liabilities and related foreign exchange contracts are recognised in income.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

In the process of applying its accounting policies, the Group makes estimates and judgements that have an impact on the amounts recognised and reported in the financial statements. These estimates and judgements are based on historical experience, observable market data, published information and other information including expectations of future events that are believed to be reasonable under the circumstances. The estimates and judgements that have a significant impact on the recognised amounts in the financial statements and the processes used to determine these estimates and judgements are described below:

i) Claims and related expenses

The estimate of ultimate losses arising from existing insurance contracts includes unreported claims. Provisions for unreported claims are estimated based on actuarial analysis and application of underwriting judgment having regard to the range of uncertainty as to the eventual outcome for each category of business. The ultimate insurance liability also includes the costs to administer the claims.

ii) Ultimate premiums

The estimate of ultimate premiums is based on premium income estimates provided by cedants which is then adjusted to reflect underwriters' judgement taking into account market conditions and historical data. This estimate is subject to review by underwriters and actuaries.

Other significant estimates include fair value measurement and impairment of financial assets as disclosed in note 2.

4. MANAGEMENT OF INSURANCE RISKS

The Group's activities expose it to a variety of financial and other risks: market risk (including foreign exchange risk, price risk and interest rate risk), credit risk, underwriting risk and liquidity risk.

The following is a summary of policies adopted to mitigate the key insurance risks facing the Group:

i) Underwriting risks

The Group manages its underwriting risks principally through policies and guidelines for accepting risks and reinsurance arrangements.

Risks are accepted based on an evaluation of pricing and prior underwriting experience in accordance with underwriting guidelines that have been laid out for each line of business. Underwriting guidelines are constantly reviewed and updated to take account of market developments, performance and opportunities. Accumulation limits are set to control exposures to natural hazards and catastrophes. Various underwriting and approval limits are specified for accepting risks.

Acceptance of risks that do not meet specified minimum criteria are subject to agreement of an Underwriting Review Committee comprising representatives from the Marketing, Underwriting and Actuarial functions.

The reinsurance strategy of the Group is designed to protect exposures to individual and event risks based on current risk exposures through cost effective reinsurance arrangements.

Reserving risks are addressed by ensuring prudent and appropriate reserving for business written by the Group, thus ensuring that sufficient funds are available to cover future claims. Reserving practices involve the use of actuarial analysis and application of underwriting judgement. These are supplemented by periodical independent actuarial reviews for determining the adequacy of reserves.

ii) Credit risks

Credit risk under insurance contracts is the risk that a counterparty will be unable to pay amounts in full when due.

Credit risk is controlled through terms of trade for receipt of premium and in certain cases enforcement of premium warranty conditions. Most of the counterparties are insurance companies that are generally not rated. However, there are no significant exposures from any one counterparty.

Reinsurance arrangements are effected with reinsurers whose creditworthiness is assessed on the basis of satisfying minimum rating and financial strength criteria. Exposure to any single reinsurer generally does not exceed a maximum of 25% of total exposure and risks are generally placed with counterparties with minimum investment grade rating except for proportional treaty arrangements placed on reciprocal basis.

Credit risks relating to reinsurance arrangements are analysed as follows:

	US\$ '000		
	2017		
	Receivables	Share of claims outstanding	Total
Balance relating to reinsurers:			
- With investment grade rating	2,045	16,541	18,586
- Other	5,923	2,811	8,734
	7,968	19,352	27,320

4. MANAGEMENT OF INSURANCE RISKS (Contd.)

US\$ '000		
2016		
Receivables	Share of claims outstanding	Total
Balance relating to reinsurers:		
- With investment grade rating	1,434	30,669
- Other	10,324	19,779
	11,758	50,448

iii) Currency risks

As the Company writes business in various currencies, it is exposed to currency risk. Foreign exchange currency risks are hedged where exposures are significant and facility to hedge is available.

US\$ '000				
Euro	Pound Sterling	Indian Rupee	Kuwaiti Dinar	Other
<u>2017</u>				
Reinsurance Assets (Liabilities), net	(651)	(8,510)	(17,915)	(27,329)
Hedged	584	-	-	-

US\$ '000				
Euro	Pound Sterling	Indian Rupee	Kuwaiti Dinar	Other
<u>2016</u>				
Reinsurance Assets (Liabilities), net	(345)	(9,823)	(13,247)	(35,373)
Hedged	-	(1,244)	-	-

iv) Liquidity risks

Liquidity risk is the risk that cash may not be available to pay obligations when due. Limits have been specified in the investment policy and guidelines that requires a significant portion of investment funds representing insurance liabilities to be held in cash or readily marketable debt securities.

v) Sensitivity analysis

The sensitivity of the Group's income to market risks is as follows:

US\$ '000	
	2017
	2016
5% increase in loss ratio	(8,997)
5% decrease in loss ratio	8,997
10% increase in US Dollar exchange rate	9,149
10% decrease in US Dollar exchange rate	(11,183)
	(9,025)
	9,025
	10,615
	(12,974)

5. CASH AND BANK BALANCES

	US\$ '000	
	2017	2016
Cash and bank balances	62,938	102,908
Deposits with maturity within 3 months	-	36,500
Cash and cash equivalents	62,938	139,408
Deposits with maturity over 3 months	19,735	41,052
	82,673	180,460

Details of significant terms and conditions, exposures to credit, interest rate and currency risks are as follows:

i) Credit risk:

Bank balances and deposits with short term maturities are held with leading financial institutions. The Group limits its concentration of time deposits with any one financial institution to a maximum of 10% of shareholders' equity.

ii) Interest rate risk:

Interest receivable basis:

- Bank balances
 - Deposits with short term maturities
- Effective rates

2017	2016
Daily/Monthly On maturity 0.01 % - 2.78 %	Daily/Monthly On maturity 0.01% - 2.25 %

As the deposits are short term maturities, there is no sensitivity to interest rate fluctuation.

iii) Currency risk:

	US\$ '000	
	2017	2016
U.S. Dollar	61,895	168,451
Bahraini Dinar	10,494	7,199
Pound Sterling	6,973	550
Omani Riyal	1,074	-

	579,686	554,660

Movements in the Group's impairment recognised on available for sale investments are as follows:

	US\$ '000	
	2017	2016
At 1 January	21,515	20,994
Impairment recognised during the year		
- Unlisted companies	1,366	33
- Others	1,241	675
Reversal on sale of investments	(2,111)	(187)
At 31 December	22,011	21,515

Debt securities amounting to US\$ 183.6 million (2016: US\$ 169.9 million) have been pledged as security for reinsurance trust agreements, letters of credit, guarantees and borrowings.

Details of significant exposures to credit, interest rate and currency risks on investments are as follows:

6. INVESTMENTS (Contd.)

i) Credit risk:

The Group limits its investment concentration in debt securities in any one investee and in any one industry group to 10% and 20% respectively, of the total debt securities portfolio.

The Group also limits its investment concentration in common stock of listed companies of any one issue and any one issuer to 5% and 10% respectively, of its total common stock portfolio.

ii) Debt securities - interest rate risk:

2017		
Interest receivable basis	Effective rates	Coupon rates
Supra-nationals and OECD country government securities	Monthly/Semi-annual/Annual 0.750% - 1.875%	0.750% - 1.875%
Other investment grade debt securities	Monthly/Semi-annual/Annual 0.130% - 8.500%	0.130% - 8.500%
Other securities	Monthly/Semi-annual/Annual 2.383% - 5.500%	2.383% - 5.500%

2016		
Interest receivable basis	Effective rates	Coupon rates
Supra-nationals and OECD country government securities	Monthly/Semi-annual/Annual 0.750% - 1.625%	0.750%-1.625%
Other investment grade debt securities	Monthly/Semi-annual/Annual 0.125% - 7.750%	0.125% - 7.750%
Other securities	Monthly/Semi-annual/Annual 2.383% - 5.500%	2.383% - 5.500%

iii) Debt securities – currency risk :

	489,392	487,029	480,699	475,969

v) Common stock:

Common stocks have no fixed maturity dates and are generally not exposed to interest rate risk. However, they are subject to price risk and its sensitivity is shown in note 7. Dividends are generally declared on an annual basis.

The book value of common stock classified by currencies in which they are denominated are as follows:

	US\$ '000	
	2017	2016
U.S. Dollar	44,601	36,086
Euro	3,993	7,722
Bahraini Dinar	628	433
Saudi Riyal	10,660	5,590
Pound Sterling	1,709	2,286
Japanese Yen	2,101	877
Other	10,256	7,636
	73,948	60,630

vi) Commitments:

The Group has commitments in respect of uncalled capital in available for sale investments amounting to US\$ 8.8 million (2016: US\$ 7.3 million).

7. SENSITIVITY ANALYSIS

The sensitivity of the Group's profit or loss and total equity to market risks on its cash and cash equivalents and investments is as follows:

	US\$ '000			
	2017		2016	
	Income	Equity	Income	Equity
Interest rate				
+ 100 basis points shift in yield curves- debt instruments	(1,695)	(11,743)	(1,543)	(10,159)
- 100 basis points shift in yield curves- debt instruments	1,638	11,352	1,491	9,820
Currency risk				
10% increase in US Dollar exchange rate	(3,621)	-	(2,030)	(19)
10% decrease in US Dollar exchange rate	4,426	-	2,481	23
Equity price				
10% increase in equity prices	5,671	1,307	4,394	1,031
10% decrease in equity prices	(5,671)	(1,307)	(4,394)	(1,031)

8. ACCRUED INCOME

Accrued insurance premiums

Expected to be received :

- Within 12 months
- After 12 months

Accrued interest

- Expected to be received within 12 months

	US\$ '000	
	2017	2016
73,499	76,483	
26,863	22,869	
100,362	99,352	
2,734	2,258	
103,096	101,610	

9. INSURANCE RECEIVABLES

Balances due :

- Within 12 months
- After 12 months

	US\$ '000	
	2017	2016
110,755	108,305	
168	97	
110,923	108,402	

Movements in the Group's provision for impaired receivables are as follows:

	US\$ '000	
	2017	2016
At 1 January	14,230	14,752
Provision (write back) for impairment	652	(459)
Impaired receivables written off	-	(63)
31 December	14,882	14,230

9. INSURANCE RECEIVABLES (Contd.)

The individually impaired receivables mainly relate to counter party in financial difficulty. The ageing of these receivables is as follows:

	US\$ '000	
	2017	2016
Over two years	4,238	4,936
	4,238	4,936

The ageing analysis of receivables that are past due and not considered impaired is as follows:

	US\$ '000	
	2017	2016
Up to 6 months	6,610	4,536
6 to 12 months	4,839	12,731
	11,449	17,267

10. INSURANCE DEPOSITS

Balances due :
 - Within 12 months
 - After 12 months

	US\$ '000	
	2017	2016
- Within 12 months	18,928	22,000
- After 12 months	6,881	6,086
	25,809	28,086

Movements in the Group's provision for impaired deposits are as follows:

	US\$ '000	
	2017	2016
At 1 January	2,945	3,494
Provision for impairment	202	674
Impaired deposits written off	-	(1,223)
31 December	3,147	2,945

The individually impaired deposits mainly relate to counter parties in financial difficulty. The ageing of these deposits is as follows:

	US\$ '000	
	2017	2016
Under ten years	149	144
Over ten years	19	18
	168	162

10. INSURANCE DEPOSITS (Contd.)

The ageing analysis of deposits that are past due and not considered impaired is as follows:

	US\$ '000	
	2017	2016
Up to 1 year	6,946	6,233
1 to 3 years	14,973	16,684
	21,919	22,917

11. REINSURERS' SHARE OF TECHNICAL PROVISIONS

	US\$ '000	
	2017	2016
<u>General insurance business</u>		
- Claims outstanding	19,341	38,669
- Unreported claims	55,705	18,172
- Deferred retrocession premium reserve	37,263	26,858
	112,309	83,699
<u>Life insurance business</u>		
- Claims outstanding	11	21
- Unreported claims	71	98
	82	119
	112,391	83,818

12. OTHER ASSETS

	US\$ '000	
	2017	2016
Intangible assets :		
- Computer software	10,011	9,593
	10,011	9,593
Less : Accumulated amortisation	(9,402)	(9,245)
Net intangible assets	609	348
Other assets due within 12 months:		
- Collateralised cash deposits	20,341	12,246
- Prepayments and other receivables	7,856	5,397
	28,197	17,643
	28,806	17,991

	US\$ '000	
	2017	2016
Movement in intangible assets :		
Net book value at 1 January	348	511
- Additions	463	70
- Amortisation charge	(202)	(232)
- Disposals	-	(1)
Net book value at 31 December	609	348

Collateralised cash deposits have been pledged as security for reinsurance letters of credit and guarantees.

13. PROPERTY AND EQUIPMENT

	US\$ '000	
	2017	2016
Land	2,080	2,469
Building	18,718	19,182
Information systems, furniture, equipment and other	10,660	10,592
	31,458	32,243
Less: Accumulated depreciation	(11,373)	(10,655)
	20,085	21,588
Movements in property and equipment		
Net book value at 1 January	21,588	22,236
- Revaluation of property	(853)	-
- Additions	233	365
- Disposals	-	(37)
- Depreciation charge	(883)	(976)
Net book value at 31 December	20,085	21,588

Land and Building comprises the head office property owned and occupied by the Company since 1984 and also includes office premises of the subsidiary Takaful Re Limited in Dubai, U.A.E.

The head office property was revalued at year end by independent external valuers and classified as level 2 in the fair value measurement hierarchy as it has been valued using indicative transaction prices for similar properties and adjusted to reflect the characteristics of the property. Based on open market valuation, the fair value of land was determined at US\$ 2,080,000 as against a carrying amount of US\$ 2,469,000. The carrying amount of the land would have been US\$ 1,972,000 had the asset been carried under the cost model. The decrease in fair value of US\$ 389,000 has been adjusted from Property Revaluation Reserve. The fair value of the building has been determined at US\$ 4,968,000 as against a carrying value of US\$ 5,432,000. The decrease in fair value of US\$ 464,000 has been adjusted from Property Revaluation Reserve.

14. TECHNICAL PROVISIONS

Technical provisions comprise:

	US\$ '000	
	2017	2016
<u>General insurance business</u>		
Claims outstanding	223,388	279,957
Unreported losses	216,950	177,783
Unearned premiums	184,270	153,266
	624,608	611,006
<u>Life insurance business</u>		
Claims outstanding	13,529	14,638
Unreported losses	33,495	40,378
Unearned premiums	8,819	7,659
	55,843	62,675
	680,451	673,681

The mean term of reserves is 2.9 years and 2.7 years for non-life and life business respectively.

15. CLAIMS DEVELOPMENT

The table below shows the incurred gross and net claims including unreported losses computed with reference to earned premiums, compared with previous estimates for the last 5 years:

US\$ '000							
Underwriting year							
	2012	2013	2014	2015	2016	2017	Total
Gross							
Estimate of incurred claims costs:							
- At end of underwriting year	113,735	112,367	106,448	101,570	74,463	127,688

500,000	500,000
220,000	220,000

20. SHAREHOLDERS' EQUITY (Contd.)

b) Major Shareholders

Shareholders who have an interest of 5% or more of the outstanding and issued shares are as shown below:

Name	Nationality	No. of shares (in millions)		% of total outstanding shares		% of total issued shares	
		2017	2016	2017	2016	2017	2016
Central Bank of Libya	Libya	31.8	31.8	16.1	16.1	14.4	14.4
Emirates Investment Authority	UAE	30.5	30.5	15.4	15.4	13.8	13.8
General Pension & Social Security Authority	UAE	27.5	27.5	13.9	13.9	12.5	12.5
Kuwait Investment Authority	Kuwait	20.0	20.0	10.1	10.1	9.1	9.1
Ahmed Omar Salem Alkorbi	UAE	17.0	10.0	8.7	5.0	7.8	4.5
Emirates Development Bank	UAE	11.0	11.0	5.6	5.6	5.0	5.0

c) Shareholding pattern

The shareholding pattern in the outstanding shares of the Company is as follows:

Shares	No. of shares (in millions)		No. of shareholders		% of total outstanding shares	
	2017	2016	2017	2016	2017	2016
Less than 1%	47.2	49.0	4,493	4,540	23.9	24.8
1% to 5%	12.8	28.2	5	6	6.5	14.3
5% to 10%	28.2	11.0	2	1	14.3	5.6
10% and above	109.8	109.8	4	4	55.4	55.4

ii) Treasury stock:

The company held 21,967,818 of its own shares at 31 December 2017 (2016: 21,967,818 shares) and is carried at cost US\$ 14,793,000 (2016: US\$ 14,793,000).

iii) Legal reserve:

In accordance with applicable legal provisions and Articles of Association, the Group is required to set aside 10% of net profits each year to build a Legal reserve up to a maximum of 100% of the paid up value of its share capital.

iv) Investment revaluation reserve:

Investment revaluation reserve comprises gains or losses arising from remeasurement of available for sale investment assets. These gains or losses are carried in the reserve until the assets are disposed of, at which time the gains or losses are included in income.

v) Property revaluation reserve:

Property revaluation reserve represents the difference between the cost of land and buildings less accumulated depreciation and their fair values. Further, the difference between depreciation based on the revalued carrying amounts and the depreciation based on original cost of the property is transferred directly from Property revaluation reserve to Retained earnings.

20. SHAREHOLDERS' EQUITY (Contd.)

vi) Capital management:

The Group's total capital comprises paid-up capital, legal reserve and retained earnings less treasury shares. The Group's policy is to maintain a strong capital base so as to maintain client, investor and market confidence and to sustain future development of the business. The parent company is regulated by Central Bank of Bahrain, which sets and monitors capital requirements for the parent company. Central Bank of Bahrain (CBB) requires the parent company to compute the solvency margin requirement in accordance with provisions of the CBB Rule Book. The company is in compliance with the required margin of solvency.

Additionally, the company manages its capital adequacy on an evaluation of its capital requirement through risk based capital models.

21. NON-CONTROLLING INTERESTS

	US\$ '000	
	2017	2016
At 1 January	36,180	34,732
Share of comprehensive income	768	1,128

	17,508	8,042	25,550

25. OTHER INCOME

US\$ '000		
	2017	2016
Third party administration services	2,686	4,587
Income (loss) from associates	237	(217)
Other	2,672	929
	5,595	5,299

26. OTHER EXPENSES AND PROVISIONS

US\$ '000		
	2017	2016
Foreign exchange loss	686	2,015
Provision for doubtful receivable & deposits	820	376
Other	465	351
	1,971	2,742

27. EARNINGS PER SHARE ATTRIBUTABLE TO SHAREHOLDERS

Basic and diluted earnings per share has been computed as follows:

		2017	2016
Weighted average number of shares outstanding	'000	198,032	198,032
Net profit	US\$'000	7,222	9,162
Earnings per share	US cents	3.6	4.6

28. POST EMPLOYMENT BENEFITS

The Group operates a number of post-employment plans on defined benefit basis. Eligibility for participation in the defined benefit plans is based on completion of a specified period of continuous service or date of hire. Benefits are based on the employee's years of service.

The principal assumptions used for accounting purposes were:

	2017	2016
Discount rate	2.8%	2.0%
Expected return on assets	2.8%	2.0%
Future salary increases	3.3%	3.3%

The movements in the liability recognised in the statement of financial position are:

	US\$ '000	
	2017	2016
Balance at 1 January	12,398	14,236
Accruals for the year	1,532	1,371
Payments during the year	(1,727)	(3,209)
Balance at 31 December	12,203	12,398

29. FORWARD FOREIGN EXCHANGE CONTRACTS

In the ordinary course of its business, the Group uses forward foreign exchange contracts to hedge its exposure in respect of foreign currency denominated investments and insurance liabilities. In the event that the item being hedged is sold or settled prior to maturity of the forward foreign exchange contract, it is generally the Group's policy to enter into another offsetting forward foreign exchange contract of the same amount and maturity date. The notional amounts of these financial instruments are not recognised in the Group's consolidated financial statements but their fair values are recognised as assets or liabilities, as appropriate, with changes in fair value being taken to the statement of income. The contracts oblige the Group to exchange cash flows to be received in the future from foreign currency denominated investments for U.S. Dollars at predetermined exchange rates. The counter parties in respect of these transactions are leading financial institutions.

i. Forward foreign exchange contracts – by currency:

	US\$ '000			
	2017		2016	
	Notional amount purchases	Notional amount sales	Notional amount purchases	Notional amount sales
Euro	584	9,462	-	5,046
Pound Sterling	1,056	3,369	-	6,219
Japanese Yen	-	1,961	-	789
Others	-	756	-	900
	1,640	15,548	-	12,954

Notional amounts are the contract amounts used to calculate the cash flows to be exchanged. They are a common measure of the volume of outstanding transactions, but do not represent credit or market risk exposures.

29. FORWARD FOREIGN EXCHANGE CONTRACTS (Contd.)

ii. Forward foreign exchange contracts - remaining term to maturity:

All of the forward foreign exchange contracts outstanding are due in one year or less.

iii. Forward foreign exchange contracts – unrealised gains and losses:

The following table summarises the fair value of the Group's hedging portfolio of forward foreign exchange contracts at the statement of financial position date, segregating the items between those that are in an unrealised gain position from those that are in an unrealised loss position.

US\$ '000			
2017		2016	
Purchases	Sales	Purchases	Sales
Unrealised gains	42	-	285
Unrealised losses	-	-	(12)
	42	-	273

30. RECONCILIATION OF NET RESULT TO CASH FLOWS FROM OPERATING ACTIVITIES

US\$ '000		
	2017	2016
Profit for the year	8,185	10,151
Decrease in insurance funds	(24,386)	(12,299)
Change in insurance receivable/payable, net	(10,755)	24,585
Change in accrued income	(1,486)	(30,288)
Change in other assets/liabilities, net	(36,025)	7,074
Net cash used in operating activities	(64,467)	(777)

31. RECONCILIATION OF LIABILITIES ARISING FROM FINANCING ACTIIVTIES

US\$ '000				
	Borrowings	Borrowings cost	Dividends	Non-controlling interest

Other liabilities	-	-	-	-	39,365	39,365	39,365

The information disclosed in the table above is not indicative of the net worth of the Group.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, or in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Group measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

When there is no quoted price in an active market, the Group uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all the factors that market participants would take into account in pricing a transaction.

The following methods and assumptions were used to estimate the fair value of the financial instruments:

i. General:

The book values of the Group's financial instruments except investments and forward foreign exchange contracts were deemed to approximate fair value due to the immediate or short term maturity of these financial instruments.

Hence, the fair value measurement details are not disclosed.

ii. Investments:

The Company measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities
- Level 2: Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. as derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.

32. FAIR VALUE DISCLOSURE (Contd.)

- Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted market prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Valuation techniques include net present value and discounted cash flow models and other valuation models. Assumptions and inputs used in valuation includes risk free and benchmark interest rates, bond and equity prices, and foreign exchange rates. The objective of valuation techniques is to arrive at fair value measurement that reflects the price that would be received on sale of the asset at the measurement date.

The table below analyses financial instruments, measured at fair value as at the end of the year, by level in the fair value hierarchy into which the fair value measurement is categorized:

US\$'000				
2017	Level 1	Level 2	Level 3	Total
<u>At fair value through profit or loss</u>				
Held for trading				
Common stock of listed companies	56,712	-	-	56,712

- Income statement	299	(599)	(300)
- Other comprehensive income	(10)	(679)	(689)
Investments made during the year	187	4,801	4,988
Investments redeemed during the year	(452)	(2,318)	(2,770)
Balance at 31 December 2016	6,381	17,100	23,481

The carrying values of the investment held in level 3 are based on unobservable inputs and reflects proportional share of the fair values of the respective companies and their underlying net assets. The Group does not expect the fair value of assets under level 2 & level 3 to change significantly on changing one or more of the unassumable inputs. The valuations of these investments are reviewed quarterly and updated as necessary on the basis of information received from investee and investment managers. For the year ended December 31, 2017, there were no transfers in and out of level 1, level 2 and level 3 (2016: none). The fair values are estimates and do not necessarily represent the price at which the investment would sell. As the determination of fair values involve subjective judgments, and given the inherent uncertainty of assumptions regarding capitalization rates, discount rates, leasing and other factors, the amount which will be realized by the company on the disposal of its investments may differ significantly from the values at which they are carried in the consolidated financial statements, and the difference could be material.

The Group does not expect the fair value of assets under level 3 to change significantly on changing one or more of the measurable / observable inputs.

iii. Forward foreign exchange contracts:

The fair value of forward foreign exchange contracts, used for hedging purposes, is based on quoted market prices.

32. FAIR VALUE DISCLOSURE (Contd.)

vi. Fair value less than carrying amounts:

The fair value of fixed interest debt securities fluctuates with changes in market interest rates. The book value of financial assets held to maturity has not been reduced to fair value where lower, because such market rate variations are considered temporary in nature and management intends, and has the financial resources and capacity, to generally hold such investments to maturity.

33. PRINCIPAL SUBSIDIARIES & ASSOCIATES

i) Subsidiaries and Associates:

At 31 December 2017, the principal subsidiaries of the Company were:

	<u>Country of incorporation</u>	<u>Ownership</u>	<u>Non-controlling Interests</u>	<u>Principal Activities</u>
Arig Capital Limited	United Kingdom	100%	Nil	Reinsurance
Gulf Warranties W.L.L.	Kingdom of Bahrain	100%	Nil	Warranty
